

Revolutionary synchronisation – patented, maintenance and oil free

The all new NETZSCH TORNADO® T2

Revolutionary pump head and drive concept

Uncompromised design – Solutions without conflict

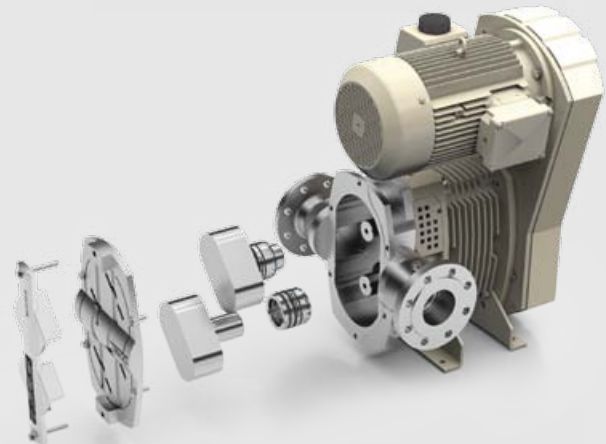

Compactness

- Revolutionary design
- Smallest installation envelope

Full Service in Place (FSIP)

- No disassembly from pipework
- Full access to pump head and belt drive
- No maintenance

Revolutionary Timing and Drive

- Synchronisation and drive of pump by tooth belt
- No oil required
- No risk of total write-off
- Less weight
- Smooth and quiet in operation

Guaranteed Customer Benefits – with advanced Technology

Process Optimisation

- Rotor retention outside of pump chamber
- Optimum cleanability
- Gentle handling, no dead areas due to clever housing geometry
- Tolerance of dry running

Outstanding Seal Technology

- Cartridge seals
- Full front loading
- Easy assembly and disassembly

Advanced Pump Technology

Revolutionary NETZSCH Pulsation Reduction System (PRS) for low pulsation even with bi-lobe rotors
