

# Z8-ZR8

Borehole pumps for 8" wells.

Z8 (AISI 304) - ZR8 (DUPLEX)

- Robustezza
- Resistenza alla corrosione
- Affidabilità

50 Hz version: Flow up to 180 m<sup>3</sup>/h - Head up to 550 m.

60 Hz version: Flow up to 210 m<sup>3</sup>/h - Head up to 550 m.

This robust and lightweight pump, easy to disassemble, is built entirely in stainless steel and resists corrosion even in aggressive environments (DUPLEX version).

Guide bearings on all the stages ensure resistance to wear and guarantee constantly reliable hydraulic characteristic over time.

The new "dynamic" wear ring reduces hydraulic losses to a minimum and keeps the pump from blocking during stand-by periods.

## Applications.

- Water supply from deep wells
- Irrigation systems
- Pressure boosting
- Fire-fighting
- Mining
- Fountains
- Pressure boosting and water distribution in municipal and industrial systems

Characteristic curves of 50 Hz Z8-ZR8 Series.
